

When you *save* ENERGY You *save* MONEY

Home Repair Services is offering FREE classes to help you discover how.

October 27: Creating your Plan

Learn how your home uses energy, the factors affecting energy use, what improvements can be made to make the home more energy efficient, and how to decide which improvements to make first.

November 3: Fixing Air Leaks

Learn how to take control of the air leaks in your home. How to find and fix air leaks — the obvious and the not-so-obvious

November 10: Understanding Appliances & Systems

Learn how the appliances in your home work and how they could work better: heating, air conditioning, hot water, refrigeration, cooking, and more!

November 17: Healthy and Green

Learn how to help your family to be energy efficient *and* healthy. Have a more comfortable, healthy, and green home. Make sure that improving your energy efficiency doesn't make you sick.

Classes will be held
on Tuesdays
from 6pm-8pm
at Home Repair Services
